5 Steps to Bliss “BuddaBag style”  
Cleaning & Drying instructions

---

## Congratulations on purchasing your New BuddaBag!!!

You've bought a BuddaBag – or maybe you've been given one as a present (lucky you!!). Either way you'll need some tips on how to enjoy your Buddabag to it's fullest. Whether you have an 6ft Maxi or a little Oobi Doobi, some of the info below will be relevant – so please read it at least once.

The attached headed BuddaBag receipt or confirmation email for online purchases acts as your proof of purchase and your guarantee. It's the first thing we'll ask to see if you need to contact us again so please check all the relevant details and tell us if anything at all needs to be changed.

## 5 Steps to Bliss “BuddaBag style”

Every BuddaBag (except Oobi Doobis) will arrive vacuum packed inside a plastic bag covered by a throwaway drawstring canvas duffle bag.

### Set-up Instructions:

- 1** Loosen the string at the top of the canvas bag and rip the outer duffle bag down to the seam. Next, remove the inner plastic covering and discard. Inside is your BuddaBag Inner, filled with magical Memory Foam.
- 2** Don't be alarmed if your Memory Foam or bag feels slightly damp upon opening – it has been rendered fire retardant through exposure to a protective liquid and may need up to 72 hours to dry fully before use. If this is the case, simply leave the Inner (without the cover on) in room temperature until it dries.
- 3** Owing to vacuum packing, your BuddaBag is not yet at its full volume. You can accelerate its growth by fluffing the foam. To do this, break up any lumps that may have formed in the foam. Next, massage the foam so it moves around inside the bag. You must also employ a kneading motion, and flip the Inner completely and repeatedly (rather like a giant pancake). There is no need to actually touch the foam to agitate it, simply follow the above steps while the Inner is still coverless and with the Inner's coloured zip fully closed do this until you feel that all the foam is free of lumps and is all in individual pieces.
- 4** Next, spread the clam-shell-shaped cover on the ground, completely open (like an open mouth) so that it is showing its inside. Place the BuddaBag Inner into the bottom 'lip' of the cover. Match the Inner's coloured zip to the outer zip on the cover so that they are aligned. Lift the lower and upper 'lips' of the cover until they meet. Close the outer zip.
- 5** If the cover's BuddaBag label is aligned with the Inner's coloured zip, then you are ready to go – jump in!!! And don't forget, keep fluffing and flipping!! The more work that you do during the BuddaBag's life (especially at the beginning), the more voluminous, durable and comfortable it will be. Just remember when fluffing your bag that the purpose is to agitate the Memory Foam, Congratulations on purchasing your New BuddaBag!!!else, so moving the cover alone has little effect. When flipping the bag take grip of the cover and interior bag and turn over 360 degrees also massaging the foam until your tag is at the front again and then well happy sitting!!

### Cleaning & Drying

All of our covers are machine washable at 30 Degrees but do not get on well with tumble dryers – so Flat Dry Only please. Almost every cover fits in a standard drum.
